

Teachers Training Partner Acrobatics Stapel Foundation

During **3 weekends** we will train skills for conducting lessons in partner acrobatics.

It's all about precise techniques and an effective lesson structure for the future teacher:

- techniques of a wide range of simple and complicated acrobatic tricks
- explaining tricks, analyzing the difficulties and the possible corrections
- coaching future instructors in setting up a lesson plan, conducting trial lessons and adjusting the lesson based on practical experience

Technique and more

Deepening knowledge of acrobatic techniques goes hand-in-hand with providing the material in a suitable way: awareness of the lessons' build-up, the physical effort, attention for all participants, safety and atmosphere and with an artistic or personal expression in conducting the lessons.

The participants will work together and with **real live guinea pigs**: beginner and intermediate acrobats will be invited on some of the afternoons to be taught by the future acrobatics instructors. The participants will also be expected to prepare, execute and report on assignments. The training will be in Dutch and in English.

Coaches, **Det and Jim**, have 30 years of experience in teaching acrobatics and are very enthusiastic about teaching younger generations the tricks of the trade.

After completing the training you will receive a certificate from the Stapel Foundation.
